

Become a TypeFocus Practitioner and expand your horizons.

The TypeFocus Certification program has been designed for career counselors/coaches. As such, people wanting to be certified need to demonstrate their skills by using the TypeFocus program with clients as part of their training. Prospective practitioners need to be over 21 and have a professional need for the certification. Anyone who works in an educational institution would meet this requirement. Professional career counselors or executive coaches would also meet this requirement.

TypeFocus Certification Program
For *TypeFocus* Careers

Participant Guidebook

The Certification Program is a robust combination of self-paced-study, completion of 10 assignments based on the MBTI™ Manual (MBTI is a registered trademark of CPP), two client debriefings and a final interview. It is an online, mentor-based program. When you first register, you will be assigned a TypeFocus Mentor and access to the online assignments and response links.

At all times you will be supported through the assignments by your mentor and a TypeFocus Practitioners Community of Practice Forum. When finished, your name will be added to our online list of Certified TypeFocus Practitioners and you will be authorized to use the TypeFocus Logo and the words "Certified TypeFocus Practitioner" on your business cards and website.

The cost for an individual is \$350 and requires access to the MBTI™ Manual. The program is entirely online and self-paced with mentor support at all times. Group purchases can be arranged with discounts based on volume.
